2007 Buccaneer Hotel, St Croix, USVI

Design for a 11,000 sf support building to move back office functions and supply storage away from main hotel. MCSA interviewed departmental heads to develop a design program, generated several site planning scenarios and a schematic design within a traditional Danish model for cost estimating.

2007-8 Southgate Coastal Reserve Field Station
St Croix Environmental Association

MCSA worked with the Director and a committee of Board Members to develop an educational center at a 100 acre salt pond. The Site Plan created trails and access blinds for public viewing of the bird activity, separation of vehicle access to critical habitats, and an office and classroom function for hosting school visits. Low impact and sustainability were the main project criteria so there was extensive use of solar panels and a wind generator for power, a vegetated pond for sewage, and a paving system that permitted drainage.

2006 Caribbean Museum Center for the Art
Fredricksted, St Croix

MCSA was retained to create a design for a new addition that could obtain approval from the Historical Commission. We also resolved accessibility issues and redesigned the circulation.

2006 Paris Realty Commercial Building
Christiansted, St Croix

MCSA provided multiple site studies for a commercial building involving variations of property assembly.

- 2004 Emergency Operations Center, St John Rescue
St John, USVI
- Pro bono project working with St John Rescue, a volunteer group, to study the options for using a surplus government building for a Emergency Operations and Communication center.
